4-1/2" O.D. ALUMINUM DELUXE COMPETITION POST (208 lbs)

MODEL #2217-41

4-1/2" O.D. GALVANIZED DELUXE COMPETITION POST (170 lbs)

MODEL #2217-41A

4-1/2" O.D. ALUMINUM DELUXE COMPETITION POST (148 lbs)

GENERAL: Volleyball posts are available with fixed eyes, net tightener, and side pulley - depending on model selected. All models consist of a pair of posts, except center posts which are designed for side-by-side courts, & include only one post. All posts are equipped w/ fittings for proper net attachment.
NOTE: See page 3 & 4 for included accessories.

MATERIAL: All materials are selected for strength, durability and the ability to withstand years of exposure.

POSTS: A 4-1/2" O.D. heavy-duty galvanized steel post. All posts are fabricated from galvanized steel pipe. Overall length of all posts is 10'-6".

ROPE CLAMPS: A heavy-duty self-securing clamp, die-cast from rustproof "zamak" metal. Designed to take rope sizes 1/8" to 3/8". Designed to take stress off of rope, as it has a smooth grooved track for the rope.
NOTE: For use on nets with rope suspension.

NET TIGHTENER W/ REMOVABLE HANDLE: Permits easy and accurate tensioning of the net. Designed for use on nets with cable or rope suspension. Aluminum cast with a removable handle to lock in place. Pull pin and remove handle.

SIDE PULLEY: All welded construction of heavy gauge steel galvanized or powder coated. A 2-1/2" Dia. pulley on a 3/8" diameter shaft guides the net cable or rope to the tightener.

FIXED EYES: 3/8" diameter zinc-plated steel eyebolts for all models. Heavy steel eyebolts for center post double eyes. These fixed eyes are welded on square post models.

EYE NUT: 3/8" eye nuts have internal threads and are used for extending eyebolt for double sided eyes on center posts. Zinc finish.

FINISH: All welds are ground smooth and either treated with cold galvanized compound or prepared for powder coat depending on finish selected.

WARRANTY PERIOD: 10 years

VOLLEYBALL

INSTALLATION INSTRUCTIONS:

1. Dig holes per footing detail.
2. Install eyebolts. Models with -00 will have four eyebolts and rope clamps. Models with -21 have a net tightener & a side pulley collar. Secure collars in place with a hex wrench. Tighten set screw slightly to hold.
3. Set the posts in the holes & shim from below so that the top of the posts are 8'-6" from finished grade. Plumb & brace. Pour concrete to within 2" of finish grade. Allow concrete to set 3 days. Cover footings with soil or turf. Remove bracing.
4. Secure side pulley on Models-21 so the pulley is 4" from top of pipe & in line w/ eye bolt on other side. Use set screw to secure.
5. Tighten all nuts securely. Any excess threads on eyebolts should be cut & peened smooth.
6. If ordering an optional center post follow steps 1, 2, & 3.
7. When attaching nets, the "through" rope or cable on the top of all the nets allows the netting to slide back & forth. Note: Use net tie-offs on top & bottom of nets to center net & pull tight.

NOTE: Footing sizes are based on average soil conditions. Loose and/or sandy soil is not average & footing sizes must be increased accordingly to meet local soil conditions.
